

GLOBAL MENTAL HEALTH LECTURE SERIES

Hosted by the Department of Counseling & Family Sciences

JULY 22, 5:30-7 PM

Integrative Community Therapy: Constructing Possibilities in Community Contexts through Dialogue and Shared Knowledge

ICT is understood as a social practice in which participants engage in purposeful conversations, searching for alternatives to their dilemmas and problems in ways that enhance their sense of agency and empowerment. This community-based intervention developed in Brazil is now widespread in the whole region of Latin America and is changing lives in thousands of communities.
